DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Lichti et al. (U.S. Patent 6,176,210).

Lichti et al. disclose a cam phaser comprising:

- a stator 16 (column 3, lines 26-27);
- a rotor 18 centered on and rotationally fixed to extension 48 and hence camshaft 38 (column 4, lines 15-20);
- a stator-drive element 14 or chain drive sprocket fixedly connected to the stator 16 (column 3, lines 25-27; Figure 3);
- the camshaft 38 having a collar or journal portion 36 of camshaft extension 48 provided with a radial outer circumferential surface and the stator-drive element 14 is arranged on the radial outer circumferential surface of the journal portion 36, the journal portion 36 of extension 48 being formed as a monolithic part of the camshaft 38 (column 4, lines 1-7; Figure 3);
 - the rotor being rotatable relative to the stator (column 1, lines 28-51);
- the journal portion 36 of extension 48 included within stator-drive element 14 and rotor 18 (column 4, lines 1-2), the extension 48 provided with an axial face 49 and cylindrical axial

Application/Control Number: 10/707,992

Art Unit: 3748

extension 50 onto which rotor 18 is pressed via central bore 52 such that rotor 18 is both centered on and fixed to extension 48 and camshaft 38 (column 4, lines 15-20; Figure 3), which provides for centering the stator-drive element 14 on the camshaft 38 (Figure 3);

- wherein when looking onto a free end of the camshaft 38, the rotor 18 is positioned in front of the collar or journal portion 36 (Figure 3);
 - the rotor 18 having two end faces that are planar (Figure 3).

Allowable Subject Matter

3. Claims 7-11 are allowed.

Response to Arguments

- 4. Applicant's arguments filed 14 October 2005 have been fully considered but they are not persuasive.
- 5. Applicant has amended claim 1 to include features of the collar being a monolithic part of the camshaft and the positioning of the rotor in front of the collar. Although these features may read over the prior art cited, further search revealed the above reference which clearly disclosed all the limitations of the claimed invention including the newly added features. Therefore, the arguments concerning the prior cited art are moot in view of the new rejection above.
- 6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 10/707,992 Page 4

Art Unit: 3748

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Communication

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kyle M. Riddle whose telephone number is (571) 272-4864. The examiner can normally be reached on M-F (07:30-5:00) Second Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Denion can be reached on (571) 272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
